

AI Classes in Canadian Schools

Requirements, Restrictions & Literacy Programs

加拿大中小学与高中人工智能课程

要求、限制与素养计划（中英对照简报）

Document type / 文件类型	As of / 截至日期	Focus / 重点
Policy briefing 政策简报	30 September 2026 2026 年 9 月 30 日	Federal + B.C. K-12 联邦 + 卑诗省中小学

This briefing summarizes Canada’s National AI Literacy Initiative (launched 9 September 2026) and how AI is treated in high school and other K-12 settings: what is required, what is optional, and typical restrictions. Education is a provincial responsibility; Ottawa funds literacy and teacher training but does not mandate a high-school AI course.

本简报概括加拿大“国家人工智能素养倡议”（2026 年 9 月 9 日启动），以及高中及其他中小学阶段如何对待人工智能：哪些是强制要求、哪些是可选内容、常见限制是什么。教育属省级职权；联邦政府资助素养培训与教师专业发展，但并不强制开设高中人工智能必修课。

ENGLISH VERSION

1. Bottom line

There is no Canada-wide required “AI class” for high school or other K-12 students. The federal announcement of 9 September 2026 is about free literacy resources and teacher training, not a new compulsory high-school subject.

What students actually get depends on the province, the school district, and the teacher’s assignment rules. In British Columbia, AI literacy is mainly embedded in existing courses (especially Applied Design, Skills and Technologies — ADST), not offered as a standalone required credit.

2. Federal program: National AI Literacy Initiative

Launch: 9 September 2026, Edmonton, Alberta. Funding: \$13 million partnership with the Alberta Machine Intelligence Institute (Amii). Parent strategy: Canada’s National Artificial Intelligence Strategy — AI for All.

Goal: help Canadians understand AI, use it responsibly, and (if they choose) build with it. Emphasis on assessing AI-generated information and recognizing risks such as bias, misinformation, and privacy loss.

Expected reach through Amii-led programming: up to one million post-secondary students and more than 50,000 kindergarten-to-Grade-12 educators.

Three free learning streams

Stream	Audience	What it is	When
Essentials for Educators	K-12 teachers	Self-paced course + classroom-ready resources (ethics, privacy, integrity, classroom use)	Ch. 1 open 21 Sept 2026; 5 more chapters through fall 2026

CANADA AI IN K-12 & HIGH SCHOOL EDUCATION 加拿大基础教育与高中人工智能课程：要求与限制简报			
Stream	Audience	What it is	When
Essentials for Students	Post-secondary students	Free 3-hour bilingual course via a national consortium; workplace readiness	Institutions can join from 21 Sept 2026
Essentials for Canadians	General public	Practical course through community partners; later open access	Later in 2026

The educator course is at educators.ailiteracyforall.ca. It is free, self-paced, and does not require a login for individual teachers. Topics include how AI and machine learning work; generative AI and cognitive offloading; student privacy; academic integrity; Indigenous data sovereignty; responsible classroom use; and preparing students with future-ready AI literacy. Target includes middle and high school teachers (Grades 7–12).

Important: Essentials for Students is for colleges and universities, not high school. High-school students are reached indirectly when teachers apply the educator resources in class.

Related federal program: CanCode (phase 5)

Budget: \$30 million for 2026–2028. Funds Canadian not-for-profit organizations to deliver free digital-skills training — coding, AI, data analytics, digital content — to K–12 students and teacher professional development. Target: about 1.1 million students and 76,000 teachers. Schools and districts cannot apply directly; they partner with funded nonprofits. Applications for this round closed 6 August 2026. Special evaluation emphasis on teaching responsible use of AI.

3. How AI actually appears in high school

There is no national or British Columbia-wide mandatory standalone AI credit. Students typically encounter AI literacy through:

- ADST (required in B.C. for K–9; electives in Grades 10–12 such as Computer Studies and Web Development)
- Career Education and other subjects (language arts, science, social studies — evaluating sources, bias, and AI output)
- Teacher professional development from Amii / federal resources, then applied in existing classes
- CanCode partner workshops and school-specific modules
- Occasional school-level mandates (example: University of Winnipeg Collegiate required a 2-hour AI literacy module for Grade 9–10 social studies)

New Brunswick

First province to weave AI literacy into the anglophone K–12 curriculum from kindergarten through Grade 12 (announced September 2026). Young students receive age-appropriate awareness, not chatbot use. High school students get more tool use plus critical thinking. Platform age limits and district-approved tool lists still apply.

Policy is uneven

A 2026 teacher survey found many schools still have no written policy on student AI use and limited staff training. The Canadian Teachers’ Federation has noted that K–12 is mostly provincial, while Ottawa has a role in responsible use. Ontario had no province-wide Policy and Program Memorandum on student AI homework use as of mid-2026; the binding rule is usually the school board plus the teacher.

4. British Columbia (including Surrey / Langley)

The B.C. Ministry of Education and Child Care does not require a dedicated AI course. It publishes guidance so districts and teachers can integrate AI into the existing curriculum.

Official page: Digital literacy and the use of AI in education (gov.bc.ca). Key materials:

- Considerations for Using AI Tools in K-12 Schools
- Curriculum Connections: Digital Literacy and the Use of AI (maps topics onto ADST and Career Education)
- Student posters: “What You Need to Know About AI” (elementary / middle / secondary)
- Information for Parents and Caregivers (English, French, Simplified and Traditional Chinese, Punjabi, and others)

Provincial approach: human-centred and teacher-led. AI is a supplementary tool, not a replacement for thinking or human relationships. Districts write local procedures. Individual teachers still set the rule for each assignment.

Typical B.C. school / district restrictions

Area	Usual rule
Academic integrity	Submitting AI-generated work as your own is treated as plagiarism unless the assignment allows it and use is disclosed.
Approved tools	Some districts limit classroom chat tools. Example: Vancouver School Board has listed Microsoft Copilot with Enterprise Data Protection as the approved platform.
Age gates	Many consumer tools are 13+. Younger students often need parental consent or teacher-only tools.
Privacy	Do not put student names, photos, or personal information into consumer AI tools.
Acceptable Use policies	Many district technology policies were updated in 2025–2026 to cover AI, copyright of generated content, and review before use.

5. Typical restrictions across Canadian schools

These are patterns, not a single national law. There is no Canada-wide ban on high-school student use of AI (unlike some U.S. districts or Norway’s tighter rules for younger grades).

- Do not submit AI work as your own — the most consistent rule.
- Follow the assignment: some tasks ban AI, some require citing prompts/output, some allow limited use.
- Privacy and data: no personal or student data in unapproved tools.
- Follow the tool’s own age limits and the district approved-tool list.
- Check output for bias, errors (“hallucinations”), and copyright before using it.

6. Practical takeaway

High-school students in Canada are not required to take a dedicated AI class. They are expected to build digital and AI literacy through ADST and other subjects. Teachers are being given free federal resources (Amii Essentials for Educators) to teach it.

The binding rules for a given student are: provincial curriculum + school-district policy + the teacher’s assignment instructions.

In B.C., start with the Ministry AI-in-education page and the local district Acceptable Use / academic integrity policy.

Note: This briefing is an independent compilation of publicly available government and institutional information as of 30 September 2026. It is not legal advice and is not an official Government of Canada or Province of British Columbia publication. School-level rules can change; always check the current district policy.

中文版本

1. 核心结论

加拿大没有全国统一、强制要求高中或其他中小学学生必须修读的“人工智能课”。2026年9月9日联邦政府宣布的项目，是免费素养资源和教师培训，并不是新增一门高中必修课。

学生实际学到什么，取决于省份、学区以及任课教师对每次作业的规定。在卑诗省（B.C.），人工智能素养主要融入现有课程（尤其是“应用设计、技能与技术”，ADST），而不是单独的必修学分。

2. 联邦项目：国家人工智能素养倡议

启动时间：2026年9月9日，阿尔伯塔省埃德蒙顿。资金：与阿尔伯塔机器智能研究所（Amii）合作，1300万加元。所属战略：加拿大国家人工智能战略——“AI for All（人工智能惠及全民）”。

目标：帮助加拿大人理解人工智能、负责任地使用，并（如有意愿）参与构建。重点包括判断人工智能生成的信息，识别偏见、虚假信息和隐私流失等风险。

通过 Amii 主导的项目，预计覆盖最多约 100 万名高等教育学生，以及超过 5 万名幼儿园至 12 年级（K-12）教育工作者。

三条免费学习路径

路径	对象	内容	时间
教育者必备	K-12 教师	自主学习课程 + 课堂可用资源（伦理、隐私、学术诚信、课堂使用）	第 1 章于 2026 年 9 月 21 日开放；秋季再发布 5 章
学生必备	高等教育学生	免费 3 小时双语课程，通过全国联盟开设；兼顾职场准备	高校可自 2026 年 9 月 21 日起加入联盟
加拿大人必备	普通公众	由社区合作伙伴开课，后续走向公开开放获取	2026 年晚些时候

教育者课程网址：educators.ailiteracyforall.ca。免费、自定进度，教师个人使用无需登录。内容包括：人工智能与机器学习原理；生成式人工智能与认知外包；学生隐私；学术诚信；原住民数据主权；负责的课堂使用；培养学生面向未来的人工智能素养。覆盖初中与高中教师（7-12 年级）。

重要说明：“学生必备”面向大专院校，不是高中课程。高中学生主要是通过教师把教育者资源用到课堂中间接受益。

相关联邦项目：CanCode（第五期）

预算：2026-2028 年 3000 万加元。资助加拿大非营利组织，向 K-12 学生提供免费数字技能培训（编程、人工智能、数据分析、数字内容创作），并为教师提供专业发展。目标约 110 万名学生、7.6 万名教师。学校和学区不能直接申请，需与获得资助的非营利组织合作。本轮申请已于 2026 年 8 月 6 日截止。评审中特别强调“负责任地使用人工智能”的教学内容。

3. 高中实际如何接触人工智能

目前没有全国或卑诗省统一的人工智能独立必修学分。学生通常通过以下途径接触人工智能素养：

- ADST（卑诗省 K-9 为必修；10-12 年级为选修，如计算机研究、网页开发）
- 生涯教育及其他学科（语文、科学、社会科——评估来源、偏见和人工智能输出）

- 教师参加 Amii / 联邦培训后，把内容融入现有课堂
- CanCode 合作机构工作坊，以及学校自设模块
- 个别学校自行强制（例如温尼伯大学附属高中要求 9–10 年级社会课完成 2 小时人工智能素养模块）

新不伦瑞克省

该省是首个把人工智能素养写入英语体系 K–12 课程（从幼儿园到 12 年级）的省份（2026 年 9 月宣布）。低年级以适龄认知为主，并不等于让幼童使用聊天机器人。高中阶段有更多工具使用，同时强调批判性思维。平台年龄限制和学区核准工具清单仍然适用。

政策并不整齐

2026 年一项教师调查显示，许多学校仍没有关于学生使用人工智能的成文政策，教师培训也有限。加拿大教师联合会指出：K–12 教育主要属省级职权，联邦在“负责任使用”方面仍有角色。截至 2026 年中，安大略省没有针对学生用人工智能写作业的全省政策备忘录；真正有约束力的通常是学区规定加上任课教师要求。

4. 卑诗省（含素里 / 兰里）

卑诗省教育与儿童保育厅并不要求单独开设人工智能课，而是发布指引，方便学区和教师把人工智能融入现有课程。

官方页面：Digital literacy and the use of AI in education (gov.bc.ca)。主要材料包括：

- 《在 K–12 学校使用人工智能工具的考量》
- 《课程关联：数字素养与人工智能使用》（对应 ADST 与生涯教育）
- 学生海报：《关于人工智能你需要知道的事》（小学 / 初中 / 高中）
- 给家长与监护人的说明（英、法、简体中文、繁体中文、旁遮普语等）

省级思路：以人为中心、由教师主导。人工智能是辅助工具，不能替代思考或人际联结。具体程序由学区制定。每次作业的规则仍由任课教师确定。

卑诗省学校 / 学区常见限制

方面	常见规定
学术诚信	把人工智能生成的内容当作自己的作业提交，一般视为抄袭；除非作业明确允许并要求注明。
核准工具	部分学区限制课堂聊天工具。例如温哥华教育局曾将带企业数据保护的 Microsoft Copilot 列为核准平台。
年龄门槛	许多消费级工具要求 13 岁以上。低年级往往需要家长同意，或仅限教师使用的工具。
隐私	不要把学生姓名、照片或个人信息输入消费级人工智能工具。
可接受使用政策	许多学区在 2025–2026 年更新了技术使用政策，覆盖人工智能、生成内容的版权以及使用前审阅。

5. 加拿大各地学校的常见限制

以下是常见做法，不是一部全国法律。加拿大没有全国禁止高中生使用人工智能（与部分美国学区、或挪威对低年级更严的限制不同）。

- 不要把人工智能作品当作自己的作业提交——这是最普遍的一条。

- 遵守当次作业规定：有的禁止使用，有的要求注明提示词/输出，有的允许有限度使用。
- 隐私与数据：不要把个人或学生数据输入未核准工具。
- 遵守工具自身的年龄限制以及学区核准清单。
- 使用前检查输出是否有偏见、错误（“幻觉”）和版权问题。

6. 实用结论

加拿大高中生没有被强制要求修读独立的人工智能课，但被期望通过 ADST 和其他学科建立数字素养与人工智能素养。联邦正在向教师提供免费资源（Amii《教育者必备》）以便教学。

对具体学生真正有约束力的是：省级课程 + 学区政策 + 任课教师的作业说明。

在卑诗省，建议先查看省教育厅人工智能教育页面，以及所在学区的技术可接受使用政策 / 学术诚信政策。
